

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

***CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES***

**7.2.1 BEST PRACTICES**

**BEST PRACTICE NO. 01**

**1. Title of the Practice:**

Enriched Teaching Learning (ETL) Process

**2. Objectives of the Practice:**

- Teachers facilitate students learning which helps them to gain skills, knowledge and thinking ability. Different ways to teach are often referred to as pedagogy.
- Teaching by using pedagogy involves assessing the educational levels of the students on particular skills. Understanding the pedagogy of the students in the class room involves use of differential instructions as well as supervision to meet the needs of all students in the classroom.
- To build Vmedulife application program to reduce the manual work for managing the result and attendance as well as speed up and make process easy.
- To go with computerized system, instead of old-fashioned manual work.

**3. The Context:**

Teaching learning process is the most important aspect in any educational institute. This is the process where we have much more scope in continuous improvement to evolve as completely outcome-based education system in any institute. Thus, the consistent and quality effort taken in this direction would definitely yield very fruitful result for all the stakeholders. Vmedulife- Easy management of system managed by system administrator to add/update/delete various data for faculty registration, student details, courses etc. Provides secure login with proper authentication using username and password. It provides the searching facilities based on various factors like results, students, course, exam etc. Manage the information of result editing, adding and updating of records is improved which results in proper resource management of result data. Easily export PDF/excel for result, attendance, course and exam. Vmedulife software services also provide the main sections like Outcome Based Education, Teaching and Learning and Enterprise Resource Planning.

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

***CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES***

**7.2.1 BEST PRACTICES**

**4. The Practice:** To enrich the teaching learning process in our college we have taken following steps:

- A. Student Centric Learning (SCL):** As we found a few difficulties in the traditional method of chalk and talk teaching, we have set up the classroom as student centric namely Enriched Teaching Learning (ETL) process. In this ETL method, the interaction with students has improved considerably. For example, we encouraged/motivate students to ask questions in the classrooms and outside the classroom.
- B. Activity Based Learning (ABL):** As this new process is connected with activity-based learning such as carrying out the experiments given in the practical's and then asking them about the activity as why, how and what for or about its significance. In the activity based learning students interact with teachers and peers without any hesitations. Here the focus is shifted to learning by experimentation so that their concepts get cleared. Further, PPTs, Videos, and short seminars, group discussion etc. are being used in the ETL method that results in easy understanding of the concepts by the students.
- C. Project Based Learning (PBL):** The ETL method provides a detailed learning to students and also induces them to initiate a project on the basis of what they have learnt in the classroom. A short project is given to the students in a group of 3 to 4 students and asked them to come up with solution along with the explanation. They are asked to give presentation on their project or evaluated during viva voce.
- D. Technical Quiz:** To get in-depth knowledge, technical quiz is conducted which may help students to have specified and in depth learning. In order to answer the questions asked in quiz it is very essential that the students must have deeper insight into the subject and thus students get motivated for studying in depth rather than superficial preparation to pass the exam.
- E. Mentor-Mentee scheme:** The mentor mentee meeting is conducted once per semester, counsel them to overcome the hindrances if any in their academic performance; this method is called 'Mentoring system'. Here, along with academic related issues students' personal issues are also discussed and a proper guidance and support is provided to help students to perform better.
- F. E- Academic software – Vmedulife:** All the students and faculties can easily access the system. Faculty can use the system in very secure manner to add /update the marks; attendance of the students as per convenience from work place as well as from home and students can view their results and attendance accordingly.

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

***CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES***

**7.2.1 BEST PRACTICES**

**5. Evidence of Success:**

As an end result of this practice the academic performance of the students was found to be improved consistently over a period of their graduation. The results of the college are consistently above the average result of the University. The number of students qualifying competitive and other certificate exam found to be increased successively. Vmedulife-Students and their parents can view the result and attendance of their ward and can evaluate their performance in academic. This system easily helps management to analyze student's attendance/result details as per requirement.

**6. Problems Encountered and Resources Required:**

- Large storage space
- Internet/intranet connection
- Initially the students were reluctant to discuss their problems openly with the mentor and thus faculty members were found it difficult to counsel them when they were not ready to open up or share their problem. The resources required were ICT tools, and adapting to the regular use of pedagogy tools by teachers.

**7.2.1 BEST PRACTICES**

**SEMINAR**

Seminar given by Mr. Amol A. Patil (First Year B. Pharm) on topic **“Thyroid Gland”**

**Thyroid Gland**

Presented by:  
Mr. Amol A. Patil

Under the guidance of:  
**Mr. Gajanan Shivaji Patil**  
Assistant Professor  
Department of Pharmacology

Dr. Shivajirao Kadam College of Pharmacy,  
Kasabe Digraj, Sangli (MS) 416305

**Thyroid Gland**

### Introduction

- Thyroid is an endocrine gland situated at the root of the neck on either side of the trachea. It has two lobes, which are connected in the middle by an isthmus.
- It weighs about 20 to 40 g in adults. Thyroid is larger in females than in males.
- The structure and the function of the thyroid gland change in different stages of the sexual cycle in

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 388

3

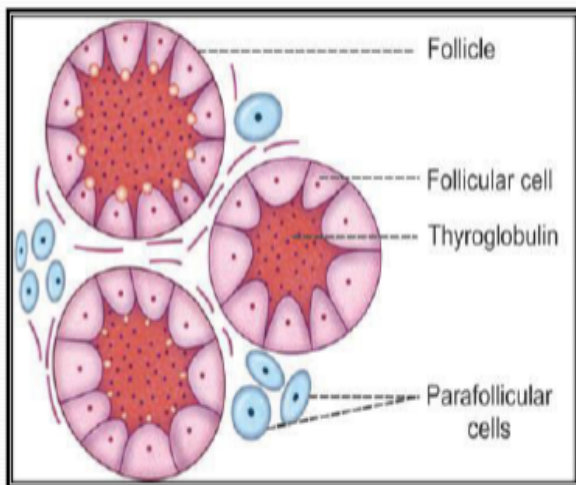

### Introduction- Histology of thyroid gland

- Thyroid gland is composed of large number of closed follicles. These follicles are lined with cuboidal epithelial cells, which are called the follicular cells.
- Follicular cavity is filled with a colloidal substance known as thyroglobulin, which is secreted by the follicular cells. Follicular cells also secrete tetraiodothyronine (T4 or thyroxine) and triiodothyronine (T3).

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 388

4

### Introduction- Histology of thyroid gland

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

5

### Introduction- HORMONES OF THYROID GLAND

1. Tetraiodothyronine or T4 (thyroxine), 2. Tri-iodothyronine or T3, 3. Calcitonin
- T4 is otherwise known as thyroxine and it forms about 90% of the total secretion, whereas T3 is only 9% to 10%.
  - **Chemistry:** Both T4 and T3 are iodine-containing derivatives of amino acid tyrosine.
  - **Half-life:** T4 has a long half life of 7 days. Half-life of T3 is varying between 10 and 24 hours.
  - **Metabolism:** Degradation of thyroid hormones occurs in muscles, liver and kidney.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 388,389

6

## Introduction- HORMONES OF THYROID GLAND

- **Potency and Duration of Action:**
- The potency of T<sub>3</sub>, is four times more than that of T<sub>4</sub>.
- T<sub>4</sub> acts for longer period than T<sub>3</sub>.
- Duration of T<sub>4</sub> action is four times more than T<sub>3</sub> action. This is because of the difference in the affinity of these hormones to plasma proteins.
- T<sub>3</sub> has less affinity for plasma proteins and combines loosely with them, so that it is released quickly. T<sub>4</sub> has more affinity and strongly binds with plasma proteins, so that it is released slowly. Therefore, T<sub>3</sub> acts on the target cells immediately and T<sub>4</sub> acts slowly.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

7

## Synthesis of thyroid hormones

- Synthesis of thyroid hormones takes place in thyroglobulin, present in follicular cavity.
- Iodine and tyrosine are essential for the formation of thyroid hormones.
- Iodine is consumed through diet. It is converted into iodide and absorbed from GI tract.
- Tyrosine is also consumed through diet and is absorbed from the GI tract

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

8

## Synthesis of thyroid hormones

- Synthesis of thyroid hormones occurs by following stages:
  1. Thyroglobulin synthesis
  2. Iodide trapping
  3. Oxidation of iodide
  4. Transport of iodine into follicular cavity
  5. Iodination of tyrosine
  6. Coupling reactions

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

9

## Synthesis of thyroid hormones

- 1. **Thyroglobulin Synthesis:** Endoplasmic reticulum and Golgi apparatus in the follicular cells of thyroid gland synthesize and secrete thyroglobulin continuously. Thyroglobulin molecule is a large glycoprotein containing 140 molecules of amino acid tyrosine. After synthesis, thyroglobulin is stored in the follicle.
- 2. **Iodide Trapping:** Iodide is actively transported from blood into follicular cell, against electrochemical gradient. This process is called iodide trapping.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

10

### Synthesis of thyroid hormones

- 3. **Oxidation of Iodide:** Iodide must be oxidized to elementary iodine, because only iodine is capable of combining with tyrosine to form thyroid hormones. The oxidation of iodide into iodine occurs inside the follicular cells in the presence of thyroid peroxidase. Absence or inactivity of this enzyme stops the synthesis of thyroid hormones.
- 4. **Transport of Iodine into Follicular Cavity:** From the follicular cells, iodine is transported into the follicular cavity by an iodide-chloride pump called pendrin.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 389

11

### Synthesis of thyroid hormones

- 5. **Iodination of Tyrosine:** Combination of iodine with tyrosine is known as iodination. It takes place in thyroglobulin. First, iodine is transported from follicular cells into the follicular cavity, where it binds with thyroglobulin. This process is called organification of thyroglobulin. Then, iodine (I) combines with tyrosine, which is already present in thyroglobulin.
- Iodination process is accelerated by the enzyme iodinase, which is secreted by follicular cells. Iodination of tyrosine occurs in several stages. Tyrosine is iodized first into moniodotyrosine (MIT) and later into di-iodotyrosine (DIT). MIT and DIT are called the iodotyrosine residues.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 390

12

### Synthesis of thyroid hormones

- 6. **Coupling Reactions:** Iodotyrosine residues get coupled with one another. The coupling occurs in different configurations, to give rise to different thyroid hormones.
- Coupling reactions are:
  - One molecule of DIT and one molecule of MIT combine to form tri-iodothyronine (T<sub>3</sub>)
  - Sometimes one molecule of MIT and one molecule of DIT combine to produce another form of T<sub>3</sub> called reverse T<sub>3</sub> or rT<sub>3</sub>. Reverse T<sub>3</sub> is only 1% of thyroid output
  - Two molecules of DIT combine to form tetraiodothyronine (T<sub>4</sub>), which is thyroxine.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 390

13

### Synthesis of thyroid hormones

Tyrosine + I = Moniodotyrosine (MIT)  
 MIT + I = Di-iodotyrosine (DIT)  
 DIT + MIT = Tri-iodothyronine (T<sub>3</sub>)  
 MIT + DIT = Reverse T<sub>3</sub>  
 DIT + DIT = Tetraiodothyronine or Thyroxine (T<sub>4</sub>)

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 390

14

### STORAGE of thyroid hormones

- After synthesis, the thyroid hormones remain in the form of vesicles within thyroglobulin and are stored for long period. Each thyroglobulin molecule contains 5 or 6 molecules of thyroxine. There is also an average of 1 tri-iodothyronine molecule for every 10 molecules of thyroxine.
- In combination with thyroglobulin, the thyroid hormones can be stored for several months. Thyroid gland is unique in this, as it is the only endocrine gland that can store its hormones for a long period of about 4 months. So, when the synthesis of thyroid hormone stops, the signs and symptoms of deficiency do not appear for about 4 months.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 390

15

### RELEASE of thyroid hormones

- Thyroglobulin itself is not released into the bloodstream.
- On the other hand, the hormones are first cleaved from thyroglobulin and released into the blood.
- Only T3 and T4 are released into the blood.
- In the peripheral tissues, T4 is converted into T3.
- A small amount of inactive reverse T3 is also formed.
- It is the biologically inactive form of T3 and it is produced when T4 is converted into T3.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 391

16

### RELEASE of thyroid hormones

- These iodotyrosine residues are deiodinated by an enzyme called iodotyrosine deiodinase, resulting in the release of iodine.
- The iodine is reutilized by the follicular cells for further synthesis of thyroid hormones.
- During congenital absence of iodotyrosine deiodinase, MIT and DIT are excreted in urine and the symptoms of iodine deficiency develop.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 391

17

### TRANSPORT OF THYROID HORMONES IN THE BLOOD

- Thyroid hormones are transported in the blood by three types of proteins:
- 1. *Thyroxine-binding Globulin (TBG)*: Thyroxine-binding globulin is a glycoprotein and its concentration in the blood is 1 to 1.5 mg/dL. It has a great affinity for thyroxine and about one third of the hormone combines strongly with this protein.
- 2. *Thyroxine-binding Prealbumin (TBPA)*: TBPA transports one fourth of the thyroid hormones. It is also called transthyretin (TTR).
- 3. *Albumin*: Albumin transports about one tenth of the thyroid hormones.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 391

18

**Actions OF THYROID HORMONES**

- 1. **Basal metabolic rate (BMR):** Thyroid hormones increase basal metabolic rate (BMR), the rate of oxygen consumption under standard or basal conditions (awake, at rest, and fasting), by stimulating the use of cellular oxygen to produce ATP. When the basal metabolic rate increases, cellular metabolism of carbohydrates, lipids, and proteins increases.
- 2. **Calorigenic effect:** To stimulate synthesis of additional sodium-potassium pumps (Na/K ATPase), which use large amounts of ATP to continually eject sodium ions (Na) from the cytosol into the extracellular fluid and potassium ions (K) from the extracellular fluid into the cytosol. As cells produce and use more ATP, more heat is given off, and body temperature rises. This phenomenon is called the calorigenic effect. In this way, thyroid hormones play an important role in the maintenance of normal body temperature.

Ref. Principles of Anatomy and Physiology, Tortora, 12<sup>th</sup> edition, 660

19

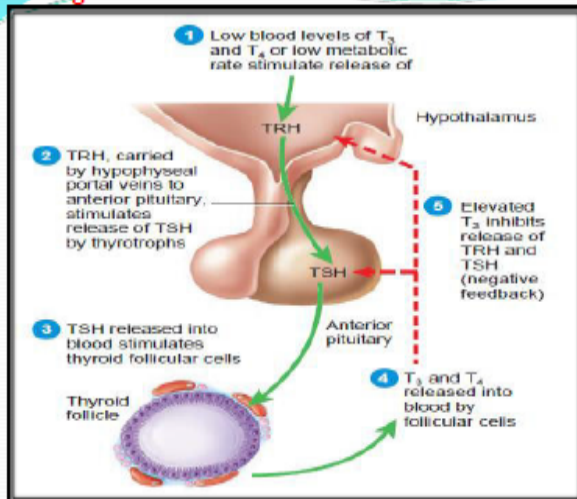

**Actions OF THYROID HORMONES**

- 3. In the regulation of metabolism, the thyroid hormones stimulate protein synthesis and increase the use of glucose and fatty acids for ATP production. They also increase lipolysis and enhance cholesterol excretion, thus reducing blood cholesterol level.
- 4. The thyroid hormones enhance some actions of the catecholamines (norepinephrine and epinephrine) because they up-regulate beta receptors. For this reason, symptoms of hyperthyroidism include increased heart rate, more forceful heartbeats, and increased blood pressure.
- 5. Together with human growth hormone and insulin thyroid hormones accelerate body growth, particularly the growth of the nervous and skeletal systems. Deficiency of thyroid hormones during fetal development, infancy, or childhood causes severe mental retardation and stunted bone growth.

Ref. Principles of Anatomy and Physiology, Tortora, 12<sup>th</sup> edition, 661

20

**Regulation OF THYROID HORMONES secretion**

Ref. Principle: of Anatomy and Physiology, J. Tortora, 12<sup>th</sup> edition, 661

21

**DISORDERS OF THYROID GLAND**

- **Hyperthyroidism:** Increased secretion of thyroid hormones is called hyperthyroidism.
- **Causes of Hyperthyroidism**

1. **Graves' disease:** is an autoimmune disease and it is the most common cause of hyperthyroidism. Normally, TSH combines with surface receptors of thyroid cells and causes the synthesis and secretion of thyroid hormones. In Graves' disease, the B lymphocytes (plasma cells) produce autoimmune antibodies called **thyroid-stimulating autoantibodies (TSAbs)**. These antibodies act like TSH by binding with membrane receptors of TSH and activating cAMP system of the thyroid follicular cells. This results in hypersecretion of thyroid hormones.

Ref. Essentials of Medical Physiology, K. Sembulingam, 6<sup>th</sup> edition, 395

22

### DISORDERS OF THYROID GLAND

2. **Thyroid adenoma:** Sometimes, a localized tumor develops in the thyroid tissue. It is known as thyroid adenoma and it secretes large quantities of thyroid hormones. It is not associated with autoimmunity.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 395

23

### DISORDERS OF THYROID GLAND

- **HYPOTHYROIDISM:** Decreased secretion of thyroid hormones is called hypothyroidism. Hypothyroidism leads to myxedema in adults and cretinism in children.
- **Myxedema:** is the hypothyroidism in adults, characterized by generalized edematous appearance.
- **Cretinism:** is the hypothyroidism in children, characterized by stunted growth.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 396

24

### DISORDERS OF THYROID GLAND

- **HYPOTHYROIDISM AND HYPERTHYROIDISM:**
- **GOITER:** means enlargement of the thyroid gland. It occurs both in hypothyroidism and hyperthyroidism.
- **Goiter in Hyperthyroidism - Toxic Goiter:**
- Toxic goiter is the enlargement of thyroid gland with increased secretion of thyroid hormones, caused by thyroid tumor.
- **Goiter in Hypothyroidism - Non-toxic Goiter:** Non-toxic goiter is the enlargement of thyroid gland without increase in hormone secretion. It is also called hypothyroid goiter.

Ref. Essentials of Medical Physiology, K. Sembulingum, 6<sup>th</sup> edition, 397

**Quiz Competition**

**Quiz Rule and Regulations**

1. Each correct question carries – 2 marks.
2. Each wrong answer carries – Minus 1 point for round II, III and IV.
3. Students can pass question in all the rounds.
4. Time limit for each question is 1 minute.
5. Question pass limit – 2 for each team in round II, III & IV.
6. No answer= 0 marks.
7. **Important rule- If in any round the score is tied and then anchor shall ask 5 questions to each group and decide the team to advance, if in case again the score is tied, they shall ask 2 questions to each group as decider round.**

Round	Total Teams	Number of Questions	Elimination of team per round
<b>I. Basic</b>	16	5 for each group	5 teams with low score
<b>II. Rapid Fire</b>	11	Maximum questions in 1 minute	4 teams with low score
<b>III. Visual</b>	7	5 for each group	3 teams with low score
<b>IV. Advanced</b>	4	5 for each group	3 teams with low score & Winner

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

***CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES***

**7.2.1 BEST PRACTICES**

**BEST PRACTICE NO. 02**

**1. Title of the Practice:**

Environmental Awareness Process

**2. Objectives of the Practice:**

- To enhance the basic knowledge of students and employees for increasing their awareness of the importance of caring for the environment in general and natural resources.
- To encourages young minds to take responsibility for protecting the natural environment and to develop environmental awareness.
- Incidentally, promoting awareness and a sense of respect for nature leads to a comprehensive understanding of the environment and a reasonable attitude towards protecting it.
- To impart ecological knowledge and promote environmentally conscious behaviour towards nature.
- To develop a sense of responsibility amongst the nature of the world to take collective actions towards the conservation and preservation of the natural environment.

**3. The Context:**

Reducing our energy use is one of the first stages towards becoming more ecologically aware or environmentally conscious. Environmental awareness is important because it can make us aware of the effects that human activity has on the planet and how that activity contributes to global warming. By encouraging the use of renewable resources like water, wind, and solar, it can also aid in the creation of a more sustainable world. But in order to have an impact, we need to be aware of the issues and potential fixes. Recycling, following correct waste disposal procedures, limiting our use of personal vehicles, and relying more on public transit are some ways we can protect the environment. Everyone can make a difference in environmental conservation because it is so important. There are numerous strategies to lessen pollution, including recycling, reducing your carbon footprint, and using electric vehicles. We can continue to inhabit the world for a long time by minimising pollution and maintaining the health of the environment.

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

**CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES**

**7.2.1 BEST PRACTICES**

**4. The Practice:** For Environmental Awareness Process in our college we have taken following steps:

**A. Tree plantation:**

Dr. Shivajirao Kadam College of Pharmacy organizes Tree Plantation activity in following ways:

Date	National / International Day
28 <sup>th</sup> July 2021	World nature conservation Day
5 <sup>th</sup> June 2018	World Environment Day
28 <sup>th</sup> July 2017	World nature conservation Day

**B. Rain water harvesting:**

Rainwater harvesting is the process of gathering and storing rainwater using artificially constructed systems that run off naturally occurring or created catchment areas, such as roofs, buildings, rock surfaces, hill slopes, or artificially repaired impervious or semi-pervious land surfaces. A sustainable practice that aids in water conservation for future demands is rainwater gathering. In the current situation, water scarcity is a serious worry. Water can be saved by using the rainwater collection procedure.

**C. Waste management:**

The procedures and actions necessary to manage garbage from its creation to its ultimate disposal are referred to as waste management or waste disposal. This covers garbage collection, transportation, treatment, and disposal as well as the oversight and control of the waste management procedure. All waste kinds, including solid, liquid, and biomedical waste, are dealt with through waste management. Waste occasionally poses a risk to human health. The entire waste management process is linked to health problems. Garbage management aims to lessen the harmful impacts of garbage on the environment and human health. Reducing the hazardous consequences of trash on the environment and human health is the goal of waste management.

**D. Green campus:**

A "green campus" is a location where sustainable and eco-friendly practices are promoted through education and environmental friendly practices. By finding sustainable solutions to the environmental, social and economic requirements of the human race, the green campus concept gives an institution the chance to

Teerthankar Education Society's  
**Dr. Shivajirao Kadam College of Pharmacy,**

***CRITERION: 7- INSTITUTIONAL VALUES AND BEST PRACTICES***

**7.2.1 BEST PRACTICES**

take the lead in reinventing its environmental culture and generating new paradigms. In order to make the campus more environmentally friendly, wasted inefficiencies must be eliminated, conventional energy sources must be used for everyday power demands, proper disposal must be handled, environmentally friendly materials must be purchased and a recycling programme must be effective. The institute has to develop time-bound plans for implementing green campus initiatives. In order to create a clean and green campus, these techniques implemented into the institutional planning and budgeting procedures. Electronic learning centre and digital library: More soft readout material should be used. Cut back on the dense readout information. Utilize email more often for formal communications, internet reading, etc. Slogan for green campus:

- A Green Campus is a Cleaner, Safer and Healthier Place to Live and Work
- Save energy for the bright future
- Save water save life
- Cut down the use of papers in daily life. Use more of ICT tools

**5. Evidence of Success:**

The college-developed green campus enhances the aesthetics of the campus while also assisting in environmental preservation. In addition to offering shelter to people, the plants are employed in scientific research. The past electricity bills show that the college can save money on the electricity bills that are due for the initiatives mentioned above. Employing water saving techniques helps keep campus green and environmentally friendly and preserves gardens. College campuses are now neat and lovely thanks to the ban on plastic goods. One of the most attractive and spotless colleges in the area was created as a result of the eco-campus tactics used. More pupils are now attending because of it.

**6. Problems Encountered and Resources Required:**

- Effective human resource planning is essential for the preservation and healthy growth of plants. The NSS, units, and drip irrigation problems were resolved.

**Notice of Tree Plantation on 28<sup>th</sup> July 2021**

## **REPORT**

### **Summary of the event:**

Trees contribute to their environment over long periods of time by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe. The NSS unit of the institute had organized Tree Plantation on 28<sup>th</sup> July 2021 at Education Dr Shivajirao Kadam College of Pharmacy Kasabe Digraj. Volunteers planted 70 trees from 10.00 am to 12.30 pm Dr. S. M. Patil, Principal, SKCP Kasabe Digraj.

## REPORT

### **Summary of event:**

Long-term contributions made by trees to their surroundings include oxygen production, better air quality, a more favorable climate, water and soil conservation, and the support of wildlife. Trees absorb carbon dioxide during photosynthesis and turn it into the oxygen we breathe. On the occasion of World Environment Day, Dr. Shivajirao Kadam College of Pharmacy, Kasabe Digraj organized Tree Plantation activity. Total 15 volunteers had participated in this camp. The student's enthusiasm motives the institution to organize many programs like this.

## **REPORT**

### **Summary of the event:**

Tree planting campaigns fight a variety of environmental problems, such as deforestation, soil erosion, desertification in semi-arid regions, and global warming, and as a result, they improve the environment's beauty and balance. The supply of oxygen rises as a result of trees' emission of oxygen and absorption of hazardous pollutants. On the occasion of World Nature conservation Day, Dr. Shivajirao Kadam College of Pharmacy, Kasabe Digraj organized Tree Plantation activity. The student's enthusiasm motivates the institution to organize many programs like this.

Green Audit Report 2023-24.

➤ **ACKNOWLEDGEMENT**

We are grateful to the committee members of Dr. Shivajirao Kadam College Of Pharmacy, Kasbe Digraj, Sangli to award prestigious project and allow us to step into the new phase of Green Audit in the College Campus. Further we sincerely thank the college staff for providing us necessary facilities and co-operation during the audit. This helped us in making the audit, a success. Further we hope, this will boost the new generation to take care of Environment and propagate these vies for many generation to come.

➤ **Introduction.**

Green audit is defined as an official examination of the effects an organization has on the environment. It is also widely known as Environmental Audit. Green Audit can be better understood as: Compliance of Environmental Laws, Audit of Environment Cost and Environment Impact Assessment and Carbon Credit. In the process systematic identification, quantification, recording, reporting and analysis of the components of environmental diversity is done . The \_Green Audit aims to analyze environmental practices within and outside the college campus, which will have impact on the eco-friendly ambience. It was initiated with the motive of inspecting the work conducted within the organization whose exercise can cause risk to the health of inhabitants and the environment. Through Green Audit, one gets a direction as how to improve the condition of environment and there are various factors that have determined the growth of carrying out Green Audit.

Green Audit Report 2023-24.

➤ **Present status of college.**

Dr. Shivajirao Kadam College Of Pharmacy was established in 2016, it mainly has two courses viz. D.Pharm and B.Pharm.

The college building has a basement floor with G+1 floor.

There are 12 classrooms, 6 cabins, 1 library, 3 laboratories, 1 girls common room and auditorium classroom.

Total Campus -	5 acre
Built up area-	3516 sq.m
No .of students-	700
No. of staffs-	25
No .of trees grown -	600
No of bore well-	2 (1 hp submersible motor)
Rain Water Harvesting-	Done.
Solarium-	None.
R.O.system-	Provided at every floor.
Drinking water tank-	1-500liter
Storage water tank-	13-2000 liter
No. of vehicles-	175
Solid waste management-	None.
Plastic free-	None.

➤ **Objective of the study.**

The main objective of the Green Audit is to promote the environment Management and Conservation in the Campus. The purpose is to identify, quantify, describe and prioritize framework of environmental sustainability in compliance with the applicable regulations, policies and standards. The main objectives of carrying out Green Audit are:

- To introduce and make students aware of real concerns of environment and its sustainability.
- To secure the environment and cut down the threats posed to human health by analyzing the pattern and extent of resource use on the campus.
- To bring out a status report on environmental compliance.

Green Audit Report 2023-24.

➤ **Assessment Methodology.**

- In order to collect factual data the assessment team has interacted with concerned management personnel and visited different areas of the institution namely common classrooms, utility area, office, staff rooms, library, electric room (meter room), overhead water storage, toilets kitchen and canteen, waste storage area, drainage system landscape ground, green house and parking, to ensure comprehensive coverage the assessment has been categorized into broad modules to facilitate a structured evaluation. The modules are as follows:

Waste management	Tree Plantation Management
Energy Conservation	Transportation Management
Water Management	Green and Biodiversity Management

- The assessment observations are supported by few photographs which have been captured during the visit.

➤ **Waste Management:**

**Observation:**

- The waste generated are mainly papers wastes, garbage, and few amount of medical waste from the labs.
- There are 3 bins provided in each floor of building ,and separate bins are provided in each classroom and laboratory, but there are no separate bins for general dry garbage and wet garbage.
- Reusing single-sided waste paper as notepads, creating a separate tray in the printing for single-sides used waste paper.
- Cardboard box are reused where possible.
- Disposable paper cups and glass cups are provided for the tea and coffee for all.
- The wet garbage from Canteen, tree leaves are used efficiently for compost.
- Compost is rich in nutrients. It is used for trees and shrubs in the campus.
- For waste water coming from toilets and washrooms they had adopted soak pit method for waste water management.

Green Audit Report 2023-24.

- The waste is dumped into the trench.

**Recommendation:**

- Need to separate bins for wastes which helps to segregate wastes easily.
- More awareness programs should be conducted by college for students, college staff about waste management.
- Proper storage and safer disposal of waste, efficient and proper waste treatment, effective waste conservation and increasing resource recovery from waste should be done adequately.
- Need to adopt vermin composting method for waste management.
- Plastic free zones should be declared by the administration .

Green Audit Report 2023-24.

➤ **Energy Management:**

**Observation:**

- About 30 Florescent tubes are installed in classroom, and offices which are being replaced by LEDs with a week, whereas other 75 Led tubes are already installed.
- Utilization of natural light when possible and electricity is appropriately used (avoiding its misuse).
- The planning of classrooms and offices is done such that there is adequet amount of light from the windows during the day time thus saving the energy.
- Shady trees are placed surrounding of the college and school.
- The college has trees and a plants, that the environment carbon dioxide frees and to maintain health of all the inmates.
- The campus has, palm trees, coconut, peepal trees, and other trees, which provide shade and beautiful ambience. And also shrubs provided along the pathway.
- Some classrooms have a lack of natural light and ventilation.
- For each classroom fans are provided. About 101 fans are installed throughout.

**Recommendations:**

- High energy consuming incandescent lights and fluorescent lights in classrooms have to be replaced by less energy consuming LED lights.
- The college can introduce solar panel to reduce carbon foot print.
- The solar lighting system or wind mills can be installed on the adequet terrace that is available.

➤ **Tree Plantation Management:**

• **Observations:**

- College has adequate amount of tress.
- At entrance of college there are abundant amount of tress, entire front view building is covered by tress which gives beautiful aesthetic view of building.

Green Audit Report 2023-24.

- Coconut trees, palm trees ,bird cherry, Nilgiri, peepal etc are different types of trees present in campus. The list is attached.

- **Observation:**
- College has adequate amount of tress.
- At entrance of college there are abundant amount of tress, entire front view building is covered by tress which gives beautiful aesthetic view of building.
- Coconut trees, palm trees ,nilgiri peepal etc are different types of trees present in campus.

Green Audit Report 2023-24.

● **Recommendations:**

- College can put some manmade nests to attract some birds which may help them to maintain the ecological balance and the reservoir zone.
- More amounts of trees should be planted in ground campus to reduce pollution; tress like tamarind, peepal should be planted as it gives more oxygen.
- Terrace gardening along with solar panels should be provided.
- Gardening, lawns and varieties of tress should be planted for elegance purpose.

➤ **Water Management:**

**Observation:**

- A water purification system is installed in college building. It is common purification system for college.
- Some were checked during the audit and were found to be standard taps which can save water.
- Washing waste water pipe from canteen and kitchens are used for tress.
- Waste water from toilets is connected to soak pits.
- There is no yet connection to municipal drainage line.
- Building has Rain Water Harvesting system.
- There is no problem, yet about the leakages as so, but the inspection is carried out .
- Number of bore wells activated are two.
- 500 liter water tank is maintained for drinking purpose, there are 13 tanks of 2000 liter capacity are maintained for toilet, garden, canteen and other purposes.

Green Audit Report 2023-24.

**Recommendation:**

- Encouraging the awareness and usage of sustainable transportation technology.
- Sharing motor vehicles between students is more preferable.
- Encourage use of bicycles for the students coming from near by areas.
- 

➤ **Green Management:**

**Observation:**

- College minimizes the use of all cleaning products and chemical pollutants.
- Avoids the use of pesticides wherever possible.
- College encourages the use of environmentally friendly materials.
- Promotes the information regarding the nature, natural resources, wildlife for the conservation of biodiversity.
- Plantation, pollution and conserving resources and creating awareness of environmental issues and responsibilities.
- Colleges in managing and improving environmental performance.

Green Audit Report 2023-24.

**Recommendation:**

- Encouraging the awareness and usage of sustainable transportation technology.
- Sharing motor vehicles between students is more preferable.
- Encourage use of bicycles for the students coming from near by areas.
- 

➤ **Green Management:**

**Observation:**

- College minimizes the use of all cleaning products and chemical pollutants.
- Avoids the use of pesticides wherever possible.
- College encourages the use of environmentally friendly materials.
- Promotes the information regarding the nature, natural resources, wildlife for the conservation of biodiversity.
- Plantation, pollution and conserving recourses and creating awareness of environmental issues and responsibilities.
- Colleges in managing and improving environmental performance.

Green Audit Report 2023-24.

**Recommendation:**

- Implementation of a green cleaning program using non-toxic products
- College should strictly ban use of plastic products in the campus.
- Minimizing the ozone depleting substances.
- Limit the use of private vehicles such as two-wheelers and cars instead use public transport where-ever possible.
- Conduct environmental awareness workshops based on.
  - i. Effect of pollution.
  - ii. Need of solid waste management.
  - iii. Socio-economic causes and consequences of future environmental changes.
  - iv. Valuing and managing ecosystem
  - v. Water shed and water management
  - vi. Impact of climate change.
  - vii. Recycling and reuse of materials
- More awareness programs amongst students and other stakeholders (faculty, other staffs, service providers etc.) need to be organized for minimizing solid waste disposal.
- Ensure that the buildings conform to green standards.
- Conservation and maintenance of trees should be carried out regularly.
- Programs and celebration without bouquet.

*Green Audit Report 2023-24.*

➤ **Biodiversity Management:**

**Observation:**

- College can take steps to increase the bird diversity.
- Grasses and herbaceous plants produce numerous seed heads that provides invaluable energy sources for migratory birds.

**Recommendation:**

- Facilitation of colonization by a more diverse flora and fauna. Adding birds boxes, and trap nests for bees as desired can create a unique and rare habitats.
- College can create habitat for living organisms in the nature in the order to enhance biodiversity.
- Adding bird's boxes, bat box, and trap nests for bees as desired can create a unique and rare habitats.
- Implementing programs to promote awareness, training and proper maintenance of green building design and biodiversity.

Ref: - 0145

Date: -26/06/2023

**CERTIFICATE**

This is to certify that " Abhalmaya Foundation" has conducted green audit at "Dr. Shivajirao Kadam College of Pharmacy , Digraj" in the academic year 2023-24 . The Green audit involves initiatives, planning, efforts, activities implemented in the college campus like environmental promotional activities, water and waste water management, rain water harvesting, tree plantation, energy conservation, paperless technology and various environmental awareness activities. This Green audit is also aimed to access impact of green initiatives for maintenance of the campus in an eco friendly manner.

The college has submitted necessary data and credentials of scrutiny. The activities and measures carried out by the college have been verified and the efforts are found to be satisfactory. The efforts taken by the management, faculty, and students towards green campus are highly appreciated.
