Comments or suggestions if any	Need for upgraded laboratory facilities with modern equipment and resources., No, The syllabus is densely packed, making it challenging to complete within the allocated time frame. The heavy theoretical focus leaves little room for innovative teaching methods like interactive and problem-based learning, Emerging topics like AI in drug discovery, pharmacogenomics, and regulatory science were not adequately covered, Practical training does not cover advanced equipment or technologies commonly used in the industry. More clinical exposure is required to prepare students for real-world challenges., Some parts of the syllabus, such as traditional manufacturing methods, felt outdated and less relevant to modern industry needs., Teachers need more training on integrating modern teaching methods and technology into the classroom. Workshops and seminars on emerging pharmaceutical trends are infrequent.
